Branch protection rules

Classic branch protections have not been configured

Define branch rules to disable force pushing, prevent branches from being deleted, or require pull requests before merging. Learn more about [repository rules](#) and [protected branches](#).

Add branch ruleset Add classic branch protection rule

Choose which environments must be successfully deployed to before refs can be pushed into a ref that matches this rule.

☐ **Require signed commits**
Commits pushed to matching refs must have verified signatures.

☒ **Require a pull request before merging**
Require all commits be made to a non-target branch and submitted via a pull request before they can be merged.

Hide additional settings ^

Required approvals
1

The number of approving reviews that are required before a pull request can be merged.

☐ **Dismiss stale pull request approvals when new commits are pushed**
New, reviewable commits pushed will dismiss previous pull request review approvals.

☒ **Require review from Code Owners**
Require an approving review in pull requests that modify files that have a designated code owner.

☐ **Require approval of the most recent reviewable push**
Whether the most recent reviewable push must be approved by someone other than the person who pushed it.

☐ **Require conversation resolution before merging**
All conversations on code must be resolved before a pull request can be merged.

Allowed merge methods [Preview](#)
Merge, Squash, Rebase

When merging pull requests, you can allow any combination of merge commits, squashing, or rebasing. At least one option must be enabled.

☐ **Require status checks to pass**

Before Merge Revision ...

3 branch rules • targeting 2 branches

Branch targeting criteria [Add target](#)

[+ All branches](#) [🗑](#)

Applies to 2 targets including `branch` and `target`
